## PRESS RELEASE

### Paper Moon

Beirut, Lebanon – 2012

Successful Lebanese printer Mr. **Gaby Abi Saab** had his sights set on raising his production to cope with customer demand for shorter deadlines while improving overall quality. The **Presstek 34 DI** helped him do just that. The **Presstek 34DI** is a highly automated four-color digital offset press that consistently produces sellable sheets in 15 minutes with up to 300 IPI and stochastic screening-increasing capabilities.

For GM Habis and Presstek this is the first machine sold in Lebanon and with over 3000 machines sold in the world.

Mr. Gaby Abi Saab of Papermoon comments: "I have always believed in the advantages of DI solutions: Offset high end quality printing 300 LPI and stochastic (FM) support, short run color, fast make-ready, and improved profitability. These advantages are what Papermoon needed to meet short deadlines."
